

Wins Soft

About Us :

WINS SOFT is one of the fastest growing IT Company providing Textile Solution to Medium and Large-Scale textile based companies. It was founded with the vision of producing innovative and affordable IT Enabled solutions to the textile industry to create a new dimension to enhance the present ability force in this industry thro' various solutions like structure analysis, designing, inventory programming, ERP solutions, etc. Wins Soft, has been a leader behind the automation efforts of textile and apparel industry since 2004. We designed this software by understanding the varieties of requirements in Textile Industry. Innovative and qualitative ideas and techniques are being used in this software and constantly upgraded by us. Various in-built special tools and techniques are available with this software, which are additional benefits to our customers. It helps the business man to maintain their cost, time, money and product quality.

OUR CORPORATE GOAL
IS TO CREATE ADDED VALUE
FOR CUSTOMERS AND EMPLOYEES,
TRUE TO THE MOTTO

Wins Soft has its own design studio to create designs for all kinds of textile products. Innovative and creative designs in Dobby, Jacquard, Printing & 3D mapping work are being made at this studio. In addition to the textile softwares, we are also developed ERP softwares for Dairy Industry and Hospital Management.

Founders of this firm

Mr. Karthikeyen and Mr. Rajasekaran are the founders of this company. They started this firm in 2004. Both of them are having excellent knowledge in development of textile software, as they are well qualified and experienced personalities in this industry. Their textile background knowledge gives them an idea to create a special software to fulfill the essential requirements of weavers and textile industry of this state as well as to improve the present scenario. They started to collect facts on needs of textile industry. They crossed many stages to design this software. Finally achieved the goal of success.

Products Overview :

WINS SOFT Textile designing software helps to create designs for Weaving and Printing applications. It is a composite package, not only a tool to create

patterns or designs for textile. It is like a multiplex. Several operations like ERP Solution, Fabric Structure Analysis, Inventory, Invoice Programming, Printing, etc., can be done with this software. A simple pattern can be explored in different dimensions. Any designer can make any type of complicated designs within a very short time. A user is not expected to have well versed knowledge in computer. There is no need to cope with any other application systems since it has in-built essential tools & techniques.

WS SMART TEXTILE COSTING SOFTWARE

It is a complete costing product helping at all phases of fabric, made-ups and garment costing. It provides accurate costing for Fabrics, Home-Textiles, Garments.

Features

- Costing and Yarn Requirement for any type of fabrics / garment / made-ups like plain, yarn dyed, grey, terry, sear sucker, chenille, chiffon, georgette, taffeta , extra warp & extra weft fabrics etc.,
- Costing and Yarn Requirement for any type of materials like cotton, silk, wool etc.,
- Textile Dictionary Provides to Search textile terms.
- Provides Yarn / Fabric Count testing Facilities.
- Auto Generation of fabric construction for given GSM.
- Provides guideline to weaving possibilities of given construction.
- This module provides excellent supports for marketing, merchandising, production units, and textile training institutes.

Accurate Costing For

- Fabrics : Gada, Plain, Yarn Dyed, Terry, Sear Sucker, Chenille, Extra warp / weft fabrics and many more
- Home-Textiles : Aprons, Kitchen Towels, Pot Holders, Gloves, Bread Basket, Table Clothes, Runner, Napkins, Cushion Covers, Place Matts, Bed Covers, Pillow Covers, Duvet Covers, etc.,
- Garments : Men, Women, Kids wear, etc.,

Types of Reports

- Buyer wise
- Country wise
- Sort wise with images
- Without images with any currency

- Yarn requirement in colour wise
- Count wise
- Work order wise in kgs. / bundles / knots

WS SMART TEXTILE DESIGN SOFTWARE – DOBBY, JACQUARD & 3D WS Smart DOBBY

It maximizes creativity, quality and quantity in designs not to mention saving in time and costs in producing samples. It also provides an excellent support for marketing and merchandising department.

Features

- Auto weave generator
- Easy tool to create single and multi layers fabric weaves
- Design / Draft / Lifting plan in graph mode and in numeric / text mode
- This will be useful for manual dobby card punching
- Stripe & Checks pattern with multiple weaves and multiple quality yarns
- Centerline pattern : Help to reduce the wastage, easy to cutting and gives better look to the garment
- Automatic colour pattern generator
- The system combines a basic fabric with all the parameters like changing weave, colour set, count and yarn
- Create 2D and 3D fabric simulations
- Create attractive pattern reports

WS Smart JACQUARD

WS Smart JACQUARD is an unique complete product helping you at all phases of jacquard design creation. Its most outstanding features are High performance in reducing colour from the original image to the desired number.

Features

- It can generate different graphs for the different qualities from a single design
- Exact double and triple cloth simulations
- Visualization and rectify any problem with the floats on the borders between different elemental weaves

- Last length control and automatic float cutting
- Create 2D and 3D fabric simulations
- Exhaustive studies of fabric colour ways without the need to use productive machines
- User friendly drawing and editing tools

WS Smart 3D

This program simulates virtual environments, incorporate new textile elements into a photograph. The simulation preserves the three-dimensional characteristics and illumination of the original image. The quality of the simulation obtained makes it impossible to distinguish it from the original. Allowing fabric to be seen in real scenes, WS Smart 3D facilitate taking any decisions. WS Smart 3D is a tool fast becoming more and more indispensable in design department all over the world.

WS SMART ERP SOFTWARES

ERP is the information backbone of any company that integrates and automates all business operations. It has well-advanced Planning and inventory management System and helps management to combine all its course of action as interconnected in order to give better control on its resources, facilitating productivity enhancements. An Integrated approach from order acceptance to final level of Shipment with incorporated financial accounting and personal management modules gives a perfect blend to the product and proven model for today's business scenario.

WS Smart ERPs are generally applied for functions and uses like

- Fabric Production ERP
- Weaving ERP
- Spinning ERP
- Processing ERP
- Home Textiles ERP

and every ERP programmes consists of various modules, sub-headers and additional functional titles. Modules, Sub-Headers & Functional Heads are briefly given in separate file.

Location & Office set up

We are geographically located in Southern part of India TAMILNADU. Our office is well established as an Information Technology Enabled Service provider Company for Textile Industry.

- Well equipped & furnished office
- Excellent working atmosphere with team spirit and commitment at each level of organization.
- Equipped with all the facilities needed for development an Training environment.

Manpower

- Well Qualified & Experienced team of professionals with exhaustive technical background.
- Technology Specific experts working on technology specific projects.
- Cohesive group of technically qualified staffs with a great courage to achieve success
- Explicit professionals in every respective fields like Software upgradation, Textile Technicians, Marketing, Customer Support & Servicing, etc.,
